INCREASING THE LIFE OF OLDER UPS SYSTEMS

The Right Choice

When power failures occur, the runtime of any UPS system is determined by the condition of its batteries. All batteries eventually deteriorate to the point where they will not support the necessary runtime.

Rather than invest in a new UPS system, Scott Batteries offers a complete line of Replacement Battery Cartridges (RBC) that will extend and re-energize your UPS system. By replacing old batteries with Scott Batteries RBC's, you are providing superior performance from a staff that has been serving the business and IT community since 1989.

Compatibility, Performance, Safety

Scott Batteries RBC's are designed to be utilized in many brands of UPS systems, including APC, Liebert, Powerware, Best Power and more.

Scott Batteries RBC's ship fully assembled with connectors, fuses, and lead wires. All are provided for a convenient and safe installation.

In addition, Scott Batteries RBC's utilize maintenance free batteries that meet or exceed all original equipment manufacturer specifications.

Best Value Solution

Replacement battery cartridges from Scott Batteries are typically priced much lower than those offered by the original UPS manufacturer.

Scott Batteries RBC's offer you the assurance of quality and reliability that only a dedicated supplier to the IT industry can provide. Our unique combination of price, quality and reliability make the Scott Batteries RBC's your best value solution!

Choosing the Right Battery Kit

Determining which battery kit fits your UPS is at times challenging. Scott Batteries has made this process simple by providing a convenient cross-over matrix that identifies exactly which Scott Batteries RBC will fit your UPS system.

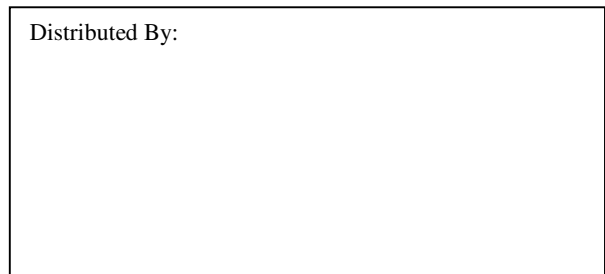

For older systems, or systems not listed, Scott Batteries' experienced support staff can assist with determining the correct battery kit for your UPS. For additional information, please call or visit us at www.scottbatteries.com.

Company Information and Profile: Scott Batteries provides replacement batteries for high availability power systems for UPS, VOIP, phone and telecommunications, emergency lighting and other critical power applications.

The company's products and services are engineered for those with the responsibility of implementing, maintaining and supporting mission critical applications.

Through our dealer network, associated services of electrical distribution, equipment sales and diagnostics, installation and equipment relocation and battery testing are also provided.
