Liebert Online Double Conversion UPS Solutions for High Availability Computer and Network Power Protection

Maximum Protection for Computers, Servers and Network Applications

The Liebert line of UPS systems provide ultra reliable, advanced power protection for small and medium size computer and data center equipment deployments from the leading manufactures including Dell, IBM, Compaq, HP and Cisco.

By providing an integrated solution that provides power conditioning, automatic voltage regulation (+ - 3%) and emergency backup power, the Liebert line of UPS solutions ensure your equipment will always be ready for the next power issue!

Solutions include single and three phase emergency UPS power with load carrying capacity from 1.0kVA to 80.0kVA with extended runtime and communication options.

Providing Power Protection with New Electrical Sine Wave Output

Liebert provides the best power protection in the industry by providing a new electrical sine wave for your connected equipment. Its online, double conversion design (AC-DC-AC) isolates your equipment from power issues that will effect your data center’s operation.

Competitively priced, you can now have Liebert engineering and quality in these compact chassis designed, easy deployed models. With a more enhanced emergency power solution and longer deployment life, a Liebert UPS system will provided a low costs of ownership, high return on investment network product.
